~CHAIRMAN'S PREFACE~

EVOLVING WORLD

Pieter Struijs, Chairman

Last year I referred to the economic constraints on the maritime industry and their impact on shipping companies in particular. Unfortunately, not much has changed since then: freight and charter rates remain low for the time being. This counts for sea-going shipping as well as for European inland waterway transport. Some companies are still struggling to survive.

An evolving world indeed

A few renowned companies have disappeared from the scene and new entrepreneurs are seizing their opportunities. Also, traditionally stable trade patterns have changed considerably, which led to a very strong focus on Asia. More often than ever before, our surveyors visit Green Award ships in the Asian region.

We see a shift from traditionally leading economies to emerging economies. This has already led to a shift in trade which, certainly, did not remain unnoticed by the Green Award Bureau.

What to think about energy resources and demands that are affected by the emerging economies on the one hand, and by the strong call for alternative sources of energy on the other? In many countries we have noticed and welcomed the introduction of wind and solar energy, but also the increasing use of biomass fuel and LNG.

As a retired port official I remain interested in the developments in the port business and those in the Port of Rotterdam in particular. It is remarkable how the port adapts to changing demands and conditions. Just one example related to energy is the launch of an LNG terminal and its future development to become a hub to serve the European market. The terminal will also offer bunkering of LNG for both inland and seagoing shipping. Green Award has already welcomed the first inland barges that are using LNG as the main fuel. Globally, several other ports prepare themselves (often within the World Ports Climate Initiative (WPCI)) for the future. We all know that the application of LNG as a fuel took off in

Norway a few years ago and we expect that this will have a spin-off to international sea going shipping.

Today discussions about the use of cleaner fuels for seagoing vessels are still going on. Low sulphur fuels (introduction of ECA's), exhaust gas cleaning systems, speed and fuel reduction measures, and, last but not least, the introduction of the Environmental Ship Index (ESI) are the measures that are supposed to reduce emissions. By means of incentives, the IAPH/WPCI's ESI program motivates ship owners to reduce their air emissions. This program does fit very well with the mission of Green Award and for that reason we have integrated the ESI as one of the elements into our requirements.

Stack emissions and Green House Gases are important issues that threaten the environment. But there are more. Today the maritime industry faces multiple challenges such as air emissions, ballast water, ship recycling etc. Also the demands on ship owners are evolving. At first, quality management and safe operations were critical elements demanded by the industry's stakeholders and they still remain high on the agenda. Environmental performance is a new topic that is driven by the society's demand for environmental protection and high cost of fuel oil.

Taking this all into account, proper implementation of Corporate Social Responsibility (CSR) principles is a necessity to stay competitive in this evolving world. The Green Award scheme, where a significant part of the industry is represented, takes pride in recognising responsible ship owners and managers. We like to promote the frontrunners in this industry.

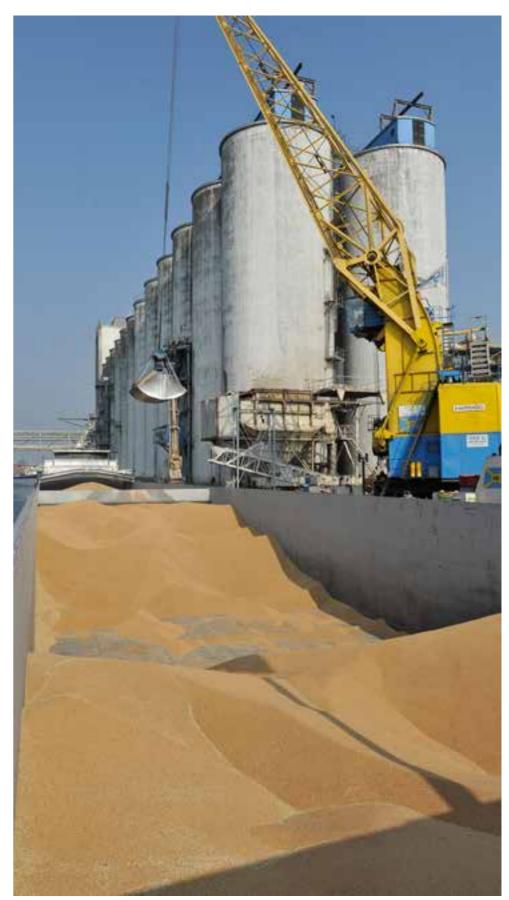

We also see evolvement in organisatons just like in our Foundation. In reports by the chairman of the Board of Experts and from the management you will read more about developments within the Foundation.

It even affects me personally. In accordance with Green Award by-laws I have to step down as Chairman of the Foundation. Together with my colleagues from the Committee I am happy and proud that we found a good successor in Prof. Harilaos N. Psaraftis.

Mr. Psaraftis will take over from me during the Committee meeting in November 2013. It has been my honour to serve the Green Award Foundation since my involvement in the founding in 1994, and as the chairman after my retirement from the Port of Rotterdam. I wish you all, ship owners, certificate holders, incentive providers, Committee and Board members and staff great success and wise decisions in this fast evolving world. Today is tomorrow's yesterday.

Thank you very much for your kind, professional and pleasant cooperation.

~REPORT FROM THE BOARD OF EXPERTS~

NEW TOPICS

Julian Parker OBE, Chairman

The purpose of the Board of Experts is to advise on the standards to be applied for vessel and office audits as specified in Seacure for Operations. A number of new issues have exercised the Board over the past year which included the finalisation of two new specifications for the audit of LNG carriers and Chemical carriers. The Board also approved the comprehensive training programmes for the surveyors who would be engaged to audit these additional ship types.

The inland waterway barge scheme which has now been running for two years was reviewed and it was agreed to set up a specialist sub-group to consider and make recommendations for improving the scheme in the light of past experience. The sub group plans to make its report early in 2014.

There were a number of technical subjects under discussion which reflected convention and resolution changes within the IMO. These included bilge water management to reduce toxic and polluting residues, practical recommendations concerning Vessel Voyage Data Recorders where the Board wanted to encourage a play back feature for sharing experiences of unusual events and near misses to support learning and best practice.

Inevitably, with time, elements of Seacure for Operations become overtaken by events and need editing. A considerable amount of time has been devoted to this activity to ensure as far as is reasonably possible that the standards are fully up to date and properly indexed.

The Board has kept under review the certification process and monitored the percentage of ship and office audits which became overdue. The Board standard is to aim for no more than 5% overdue inspections and it was most encouraging to see that this performance standard was being maintained.

At each meeting the Board reviews the number and type of 'findings' resulting from ship and office audits and the three elements which presented the

most difficulty for owners were - the Environmental Ship Index, promoted primarily by the International Port Industry

- the basic requirements to have an inventory of hazardous and toxic materials on board as part of The Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, and

the need to provide procedures to ensure critical and stand-by equipment are available and the crew aware of their importance

A number of changes to Board membership are taking place and I would like to thank Mr.Jan Smit of Bureau Veritas and Capt. John Koster, United States Coast Guard for their valuable input during their time with us. Also the Board discussed the appointment of a new chairman and made recommendations to the Management Committee whose decision will be formally announced

To end on a personal note, everybody in shipping appreciates that the past few years have been challenging. The banking crisis sent shock waves through world economy and this has affected trade. However the marine environment remains sensitive to toxins and pollution as well as acidification due to greenhouse gasses. It is encouraging to see more commercial companies recognising this by signing up to environmentally friendly sea transport as part of their corporate social responsibility and the fact that Green Award has maintained its standards throughout means that certified ships are becoming more attractive to prospective charterers. My special appreciation to colleagues on the Board, surveyors, and the office staff who all work tirelessly to achieve the standards, which we all believe can make a significant contribution to the quality of the marine environment.

GROWTH

Jan Fransen, Managing Director • Karin Struijk, Deputy Managing Director

Seagoing ships

Development in the number of ships In 2012 we received 54 applications. We certified 52 newly applied ships, including 31 LNG carriers, 18 oil tankers, and 3 bulk carriers. In total 61 ships were withdrawn from the scheme due to a change of trade, scrapping, change of owner/manager or non-compliance with the Green Award regulations. Also political sanctions forced one of our

We carried out 184 ship surveys. At the year end, the number of certified ships was 217, a net decrease of 4% compared to 2011.

clients to take out its ships.

This decrease was outweighed in the first six months of 2013. We received 23 applications: 11 dry bulk carriers, 11 oil tankers and 1 LNG carrier. We certified 30 new ships and 13 ships were withdrawn, so the total number of ships increased by 17, being 8% compared to 2012.

New certification programme

As of mid 2012, chemical tankers with a DWT \geq 20,000 are also eligible for Green Award certification. The initiation of a programme for chemical tankers was driven by the demand from potential certificate holders and our own initiative, whilst at the same time the Foundation aimed to increase diversity in its certification scheme through increasing the impact by broadening the scope of ship types to be certified.

Intermediate Survey scheme

In 2012 we introduced the Intermediate Survey scheme. The intermediate survey is awarded to the oil tankers that perform better than other Green Award certified vessels of this type, in order to reduce survey burden for those ships. A stringent yet simple set of criteria is looked into in order to identify ships that pose less risk to the marine environment and to the crew in terms of pollution, safety and quality, and ships

Despite the global recession in shipping, currently we are fortunate to see a growth in number of certified ships, along with a growth in number of incentive providers. This enhances reciprocal beneficiary relationships: ships have a better image, receive discounts on port dues or other incentives whilst incentive providers benefit from ships that are extra clean and extra safe. And, last but not least: the environment is the ultimate beneficiary.

It is our pleasure to report below on 2012 and to give a preview of 2013, based on the outcome of the first half of the year.

We welcomed the following companies:

- Tanker certificate
- Chevron Tankers Ltd. (London, United Kingdom)
- Kyklades Maritime Corporation (Piraeus, Greece)
- LNG certificate
- Shell International Trading & Shipping Co Ltd (London, United Kingdom)

In the first half of 2013, we executed 11 office audits and welcomed two new companies:

Bulk carrier certificate

• FML Ship Management Ltd (Nicosia, Cyprus)

LNG certificate

• Iino LNG (Tokyo, Japan)

Incentive providers

We were fortunate to welcome the following parties that grant the Green Award certified ships a discount on port dues or on other services:

JLMD E. Group

JLMD gives a 10% discount on the standard engineering costs for the service for the Fast Oil Recovery System to all types of Green Award certified vessels.

Port of Sept-Iles

The Port Sept-Iles, Quebec, Canada gives a 10% discount on harbour dues

The scheme, meant to motivate and give recognition to clean inland shipping, is developing successfully: the first three certificates were handed over in June 2011 and the total number of certified ships reached 472 by the end of June 2013.

Incentive providers

Vital for the certification scheme is the availability of incentives. We were fortunate to welcome the following incentive providers in 2012, giving a discount on port dues or a contribution to the certification cost:

Municipality of Meppel 6%
Groningen Seaports – Eemshaven 5%
Groningen Seaports – Delfzijl 5%
Port of Rotterdam 15%
Port of Moerdijk 15%
Port of Dordrecht 15%
(incl. Zwijndrecht, Papendrecht)

In 2013 the list was extended withZeeland Seaports - Vlissingen10%Zeeland Seaports - Terneuzen10%Port of Utrecht30%Port of Ghent10%Municipality of Bergen op Zoom5%Zicht Insurance company€ 200

Committee

In 2012, Captain A. (Andrew) Clifton replaced Mr Wayne on the Green Award Committee.

Chemical Distribution Institute (CDI). Captain Snaith is familiar with the Green Award scheme as he provided his expertise to Green Award while serving as Marine Director of INTERTANKO. We also welcomed Ajay Gour. Mr Gour has been with INTERTANKO since 2007 and is their Senior Manager for Chemical and Vetting, Operations and technical issues. Mr Abdurrahman Mohamed M. A. Al-Mulla is also a new member of the Board of Experts. Mr Al-Mulla has been working for the LNG shipping industry for many years and has comprehensive experience of managing LNG vessels and knowledge of various aspects of the gas industry.

Captain J.W. (John) Koster, who represented the US Coast Guard on the Green Award Board of Experts, resigned from the Board following his retirement from the US Coast Guard. During a change of command ceremony in June 2012 in Japan, the Green Award management handed over a certificate of recognition to him acknowledging his great contribution to the Green Award scheme.

Mr C.J. (Julian) Parker OBE FNI will step down as Chairman of the Board of Experts in 2013. Green Award will certainly miss him in that role but, above all else, will miss him as a person genuinely interested in people on board and people in the office. He combined that skill with a tremendous insight in how things work aboard ships. We are grate-

inland shipping. We are pleased to have these people onboard and are confident that they will contribute to the further development of Green Award.

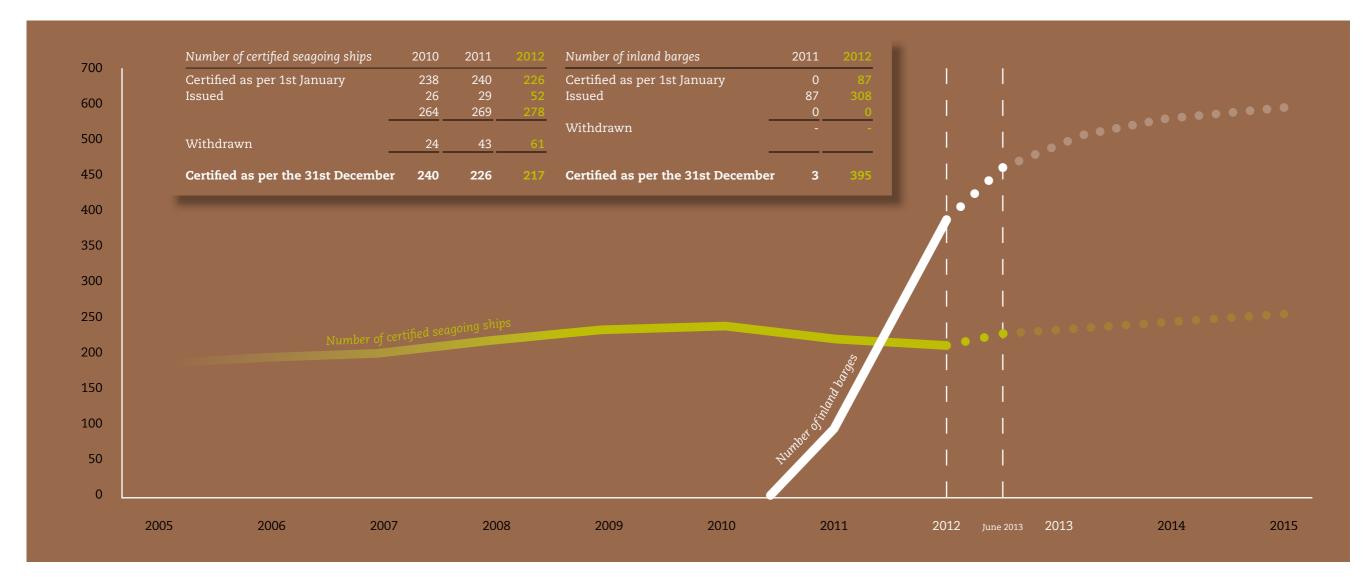

In January 2013 the Green Award team celebrated an important milestone: 5 of the foundation employees had been working for Green Award for over 12.5 years. Green Award is proud to have such loyal employees that have dedicated years to working for the foundation and are still enthusiastic about their work. Their professionalism and experience benefit the scheme and our certificate holders.

Our long time employees are Mrs. Mieke Weteling, Peter van Hattum, Rob den Heijer, Ben Metselaar and Jan Fransen. And, there was one more milestone: Capt Ben Metselaar is our first retiree since the Green Award Foundation was established. He left Green Award as of the 1st of May, 2013. During the past 13 years, Ben had surveyed hundreds of sea-going vessels and gained respect of certificate holders for his knowledgeable approach. The Green Award team wishes Ben the best of luck with all his plans and to enjoy his retirement.

Finance

The Green Award Foundation reports a surplus for the fiscal year 2012. Details can be found in the relevant chapter in this report. The Green Award tariffs for all types of vessels remained unchanged in 2013. For the eleventh consequent year oil tanker application and annual fees remained the same. The tariffs for bulk carriers, chemical tankers, LNG carriers and inland navigation vessels remained the same as in 2012.

In these challenging conditions the Green Award foundation keeps promoting high standards in shipping and caring for safe marine environment. We do our utmost to keep the costs for our certificate holders as low as possible to support them in these difficult times. In this context it is worth mentioning

that ensure smooth operations for the Green Award certification scheme. An intermediate survey replaces two annual surveys that usually take place after a renewal survey for oil tankers. By the end of June 2013, 34 oil tankers had been granted an intermediate survey.

Cooperation with ESI (Environmental Ship Index)

It is Green Award's ambition to cooperate with other environmental incentive schemes. With the ESI focusing on air emissions of NOx, SOx and CO2, being three of the over 50 important environmental and safety elements Green Award includes in its inspection criteria, it is only natural to join forces in order to achieve the best results in the aspect of minimising the impact of emissions on the environment. Green Award incorporated a simple verification check of ESI data during the regular Green Award ship surveys. With the ever-increasing amount of inspections onboard ships, this approach will prevent Green Award certified ships/certificate holders from facing yet another inspection burden.

Office audits

We conducted 9 office audits in 2012. All companies were successful in obtaining or renewing the Green Award Office Certificate, which is valid for three years.

only to all GA certified vessels from 01-01-2012.

Zeeland Seaports

Zeeland Seaports has been supporting the Green Award scheme for years with a 6% discount on the port dues for Crude oil/Product Tankers. From 2012 the discount of 6% is also applicable to bulk carriers.

Port of Gibraltar

The Port of Gibraltar awards sustainable ships certified by Green Award with a 5% reduction in tonnage dues starting the 1st of April 2013.

Port of Rotterdam

Rotterdam is the first port in the world to reward sea-going LNG carrying vessels holding the Green Award certificate. From the 1st of January 2013 the Rotterdam Port Authority gives these vessels a 6% discount on port dues.

Green Award is thankful to all incentive providers, they play a pivotal role in the effort to acknowledge, recognize and motivate sustainable shipping.

Inland shipping

Development in the number of ships In 2012 we welcomed 308 inland barges.

Capt Clifton, like his successor, will make his expertise in the LNG sector available to the Green Award foundation. He is the General Manager and Chief Operating Officer of SIGTTO (The Society of International Gas Tanker & Terminal Operators Ltd) and has over 30 years experience in the liquefied gas shipping industry.

Chairman P. (Pieter) Struijs will resign from the Green Award Committee in 2013. He deserves special compliments: he is the founding father of Green Award. His personal involvement furthered the development and growth of the Green Award Foundation and its certification program. Mr Struijs will delegate his responsibilities to his successor during the next Green Award Board meeting in London in November 2013. The Green Award Foundation has named the Greek Harilaos N. Psaraftis as its new Chairman. Harilaos N. Psaraftis is currently Professor of transport optimization at the Technical University of Denmark (DTU), Department of Transport.

Board of Experts

In 2012 Captain Howard N. Snaith returned to the Green Award Board of Experts. He is General Manager of the ful to him for the fact that he has made his knowledge available to Green Award since its foundation in 1994.

Mr Parker's successor is Mr David J. Patraiko BSc MBA FNI, Director of Projects at the Nautical institute. He has extensive experience chairing international technical committees and we are confident that he will lead the Board of Experts to a new phase of development.

Board of Appeal

The composition of our Board of Appeal did not change in 2012. However, it will change in 2013 due to the fact that Chairman D. Roemers wishes to step down as chairman. We are confident of announcing a successor to Mr Roemers before the end of 2013.

Bureau

Our dedicated team executed their work in an enthusiastic and professional way, with zero incidents and zero accidents. The team has expanded. In 2012, Jan van Nieuwland joined us as inspector inland shipping, followed by Tom van Ginkel who is a surveyor for the seagoing ships. In 2013 we welcomed Hary Harinder as research officer and Wim van Gils as inspector

that our recently introduced Intermediate Survey Scheme will foster a lower inspection burden and hence a better cost-benefit ratio.

External activities

We visited many Green Award stakeholders world wide. Please see an overview of our activities in the relevant chapter in this report.

Future

We expect a modest growth in the number of certified LNG ships and inland barges, but also foresee that the number of oil tankers will decrease due to the economic situation. A certification scheme for container carriers approaches its completion for implementation in 2013, and we also expect a number of applications for this ship type.

Furthermore, we will continue inviting incentive providers to join the Green Award scheme. Reciprocal beneficiary relationships, with the environment as ultimate beneficiary: that is our dream.

We thank everybody involved for their contribution of time and talent.

FML SHIP MANAGEMENT LIMITED

In the wake of worldwide shipping recession and slowdown, FML Ship Management Limited, Cyprus has shown foresight and commitment to implementing international standards to manage safety and quality assurance risks, and added another feather in their cap by obtaining Green Award.

The Green Award certificate comes from the Green Award foundation which promotes quality shipping amongst seagoing vessels. Green Award certifies ships and ship managers that prove their dedication to high quality, safety and environmental standards.

Green Award senior inspectors Mr Peter van Hattum & Mr Rob den Heijer carried out a thorough check of the systems in the Cyprus office, which is a requirement in order to verify that the office is in compliance with Green Award audit standards.

FML Ship Management Limited, Cyprus is a satellite office of Fleet Management Limited (FML), based in Hong Kong, which provides a comprehensive range of ship management services to cargo ship owners worldwide and has internationally recognized quality management standards. Currently, FML is responsible for the full technical

management of more than 270 modern ships, on behalf of reputable ship owners.

Mr Sunil Kapoor, General Manager of FML Ship Management, says that managing a wide variety of vessels, brings risks into the business. Therefore Green Award is a logical step for us as it represents high standards of operation, training and management. Such certifications reflect that the company has active stake in protecting Ship Owners property and the environment.

He further adds: "It's our commitment towards the environment and this has always been top priority in our organization. We are proud to achieve Green Award certification as it reinforces our philosophy that the safe running of all the vessels is not only

more than just priority but also an integral part of the quality services supplied to our ship owners.

Health, safety and environment (HSE) are primary duty of a ship manager. We believe superior HSE performance adds value to our business by increasing productivity, improving vessel performance and reduced overall operating costs – which are so very important in these falling markets where owners are pushing us to minimize operating expenses.

In these tough times, levelheaded companies are able to go beyond conventional thinking but at the same time believe that "hands on" operation of ships will prevail.

REEDEREI DEYMANN

In the beginning of 2012 Reederei Deymann joined the Green Award scheme. Our first barge that obtained the Green Award certificate was mts Marten Deymann. Up to now nine inland barges owned by us and one barge managed by us have successfully passed the Green Award certification. These nine barges form a significant part of our total fleet, consisting of 23 barges, both tankers and dry cargo carriers for the container business. Certification of more ships is planned and will take place in the near future. Our diverse fleet is capable of carrying nearly all types of liquid cargo, petrol and chemical products as well as containers.

The Green Award certificate is an audible way for us to demonstrate our commitment to the principles of green shipping and to the sustainable operation of our company. Due to a large number of young double hull barges in our fleet, we were able to join the scheme as one of the first inland shipping companies. Since 2007 Reederei Deymann has been implementing and benefiting from new technologies, such as emission and after treatment solutions, and intends to start using a water emulsion system soon. Improvements like these are important for inland navigation vessels in the future, specifically with regard to the environmental regulations.

Green Award is not just another certificate. It comes with benefits such as discounts on harbor dues and creation of a greener image for our barges which gets noticed by our customers. Furthermore, through our participation in the Green Award scheme, the crew becomes aware of issues like fuel saving and protecting the environment. Yet another benefit of the Green Award program is that the crew acts environmentally-conscious in every decision they make.

We will continue supporting the further development of the Green Award scheme.

PORT OF GIBRALTAR

Gibraltar occupies a prime strategic position at the entrance of the Mediterranean Sea and close to the north-south eastern Atlantic shipping lanes; a position which is truly at the crossroads of world shipping trade. The advantages presented by geographical location have been capitalised upon over recent years to develop Gibraltar into the major bunkering Port for the region.

Around 70,000 ships a year transit the Straits of Gibraltar, of which around 8,300 visit Gibraltar's waters for fuel or one of the other marine services offered in the Port. It is estimated that Port activities account for around 35% GDP of Gibraltar. During the past year, 4.2 million tonnes of bunkers were delivered to visiting ships.

Gibraltar is also a major cruise destination which features on a number of the itineraries of major cruise lines. Around 180 cruise ships visit Gibraltar each year bringing some 300,000 passengers.

The Government of Gibraltar has made a major commitment to ensure that all activities are assessed for their environmental impact, and best practices employed to mitigate residual risks. To this end, the Gibraltar Port Authority has invested heavily in maintaining strict codes of practice for a broad spectrum of activities including bunkering, the supply of lubricating oils and ship-to-ship transfers.

The decision to become an Incentive Provider under the Green Award Scheme was taken in order to make the Port of Gibraltar more attractive to high quality shipping which, due to the stringent auditing standards, reduces risks to the environment

Gibraltar is proud to be associated with the Green Award Scheme; a scheme which demonstrates real commitment to raising and maintaining high standards of ship operation for the benefit of the global environment.

ACCOUNTING POLICIES USED FOR THE FINANCIAL STATEMENTS

Tangible fixed assets

Tangible fixed assets in use by the company

Tangible fixed assets in use by the com-

pany are carried at the cost of acquisition or production (less any investments grants) net of accumulated depreciation and accumulated impairment losses. Costs of major maintenance are recognized under cost when incurred and if the recognition criteria are met. The carrying amount of the components to be replaced will be regarded as a disposal and taken directly to the profit and loss account. All other repair and maintenance costs are taken directly to the profit and loss account.

Depreciation is calculated on a straightline basis over their expected useful economic lives, taking into account their residual value. Changes in the expected depreciation method, useful life and/or residual value over time are treated as changes in accounting estimates.

Depreciation

Office furniture, ICT and other related equipment 10 - 20 - 30 %.

Cash at bank and in hand
Cash and cash equivalents are carried at their face value.

Other assets and liabilities

All other assets and liabilities are stated at the amounts at which they were acquired or incurred.

Income and expense

Turnover is accounted for in the year in which the services are rendered. Other income, costs and expenses are allocated to the year to which they relate. Losses are accounted for in the year in which they are identified.

INDEPENDENT AUDITOR'S REPORT

The accompanying summary financial statements, which comprise the summary statement of financial position as at December 31, 2012, the summary statements of comprehensive income, changes in equity and cash flows for the year then ended, and related notes, are derived from the audited financial statements of Green Award Foundation for the year ended December 31, 2012. We expressed an unqualified audit opinion on those financial statements in our report dated 22 April 2013. Those financial statements, and the summary financial statements, do not reflect the effects of events that occurred subsequent to the date of our report on those financial statements.

The summary financial statements do not contain all the disclosures required by Dutch law including the Dutch Standards on Auditing describe financial reporting framework applied in the preparation of the audited financial statements of the entity. Reading the summary financial statements, therefore, is not a substitute for reading the audited financial statements of Green Award Foundation.

Management's responsibility

Management is responsible for the preparation of a summary of the audited financial statements on the bases described as set out in the financial statements.

Auditor's responsibility

Our responsibility is to express an opinion on the summary financial statements based on our procedures, which were conducted in accordance with Dutch law, including the Dutch Standards on Auditing 810 "Engagements to report on summary financial statements".

Opinion

In our opinion, the financial statements derived from the audited financial statements are prepared, in all material respects, in accordance with the accounting policies selected and disclosed by the entity, as set out in the financial statements.

Rotterdam, 4 June 2013

Ernst & Young Accountants LLP

signed by W.H. Borsje

GREN AWARI

IN A NUTSHELL

By rewarding high safety and environmental standards in shipping, Green Award makes above standard ship operation economically more attractive. The Green Award certification scheme is open to crude oil and product tankers, dry bulk carriers, LNG carriers, chemical tankers and inland barges.

The Green Award procedure is carried out by the Bureau Green Award, the executive body of the independent non-profit Green Award Foundation. The certification procedure consists of an office audit and an audit of each individual ship applying for certification. Amongst many others, the assessment focuses on crew, operational, environmental and managerial elements.

At ports in Belgium, Canada, Gibraltar, Latvia, Lithuania, the Netherlands, New Zealand, Portugal, South Africa and the Sultanate of Oman the Green Award vessels receive a considerable reduction on port dues. Private companies also appreciate the extra quality which Green Award guarantees. Several incentive providers, government institutions as well as private companies, grant savings to a vessel with a Green Award certificate, which subject to annual verification, is valid for three years.

AMBITION

Green Award is to drive the highest standards in environmental performance and safety in shipping

MISSION

To identify, recognize and motivate for environmentally responsible shipping through operating a non-profit certification scheme that assesses the safety and environmental performance using criteria in the following areas:

- Ship lay-out and equipment
- Quality of the organisation/management
- Human factor
- Continuous improvement
