Legend for Checklists

0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is not complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

* for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named

"Instruction Notes" located on www.greenaward.org under "Certification/Download".

Revision codes

- RN Item/question is renumbered
- RR Rating score of item/question is changed
- N New item or question
- D Item/question is deleted
- M Text of item/question is modified

APPENDIX 1

CHECKLIST - BASIC CRITERIA - OFFICE AUDIT -CONTAINER CARRIER

(UMC-06)

		CHECKLIST - BASIC CRITERIA - OFFICE AUDIT -	CO	NT/	AINE	R C	:ARI	RIEF	R - VE	RSI	ON 2	2023

	100	MANAGEMENT ELEMENTS (continued)																			
	106	RESOURCES AND PERSONNEL AND STCW			0						0										
	106.1	Does the company have a procedure to verify the integrity of the sea staff certification and medical fitness before being assigned to the ship?																			
	106.2	Have the owners/managers established documented policies concerning shore/ship personnel?																			
	106.3	Has the level of competency been defined and documented for office personnel performing functions pertinent to safety and the environment?																			
	106.4	Do arrangements include a provision for masters and officers to receive an adequate introduction and continuous update of the company's safety and environmental system?																			
	106.5	Do arrangements include training and an introduction to the quality system for the executive management ?																			
	106.6	Do office personnel receive training/courses with regard to the ISM Code and are they consistent with the MS manuals?																			
	106.7	Are records of this training/courses available?																			\square
	106.8	Are internal audits held on board the ships?																			+
	106.9	Is standard composition of crew documented in company policy?																			+
	106.10	Is personnel promotion policy (ship & office) documented in company procedures?																			
	106.11	Is the working language between the office and the vessels defined?																			
	106.12	Are all senior and deck officers conversant with the English language for maritime communication?																			
	106.13	Are operational instructions on board written in a language understood by officers and shipboard personnel?																			
	106.14	Is the working language monitored and checked by the ship's staff and verified during internal audits?																			
	106.17	Is the Master of a vessel fully conversant with the Company's Management Systems?				_													_		\square
	107	DEVELOPMENT OF PLANS FOR SHIPBOARD OPERATIONS			0		0		0		0		0		0					0	
	107.1	Does the company have procedures for the preparation of plans and instructions for key shipboard operations concerning safety of the ship and prevention of pollution?																			
	107.3	Are tasks, qualifications and responsibilities defined in the manuals and in the job descriptions?		1																-	
	108	EMERGENCY PREPAREDNESS	0		0		0		0		0		0		0			0		0	
	108.1	Does the system cover the arrangements needed to ensure that the company, day and night, is prepared to respond effectively to hazards, accidents or emergencies involving their ships?																			
	108.2	Are tasks,qualifications and responsibilities described in the manuals and in the job descriptions?																			
	108.3	Is communication with media included in the emergency procedures?																			
	108.4	Are procedures for an "Emergency room" in the office defined?																			

						_					010

		IMO ELEMENTS																		
	200	SOLAS 1974																		
	201	SOLAS, General Provisions					0		0											
	201.1	Compliance with General Provisions																		
	201.2	Compliance with IMDG-Code 2011																		
	201.3	Compliance with Cargo Securing Manual				-												_		
	212	SOLAS Certificates					0		0											
	212.1	Is an overview of the valid certificates per ship available and is the overview updated?																_		
	217	Safety of Navigation / SOLAS chart carriage requirements							0			0								
		ECDIS for Primary Navigation																		
	217.1	It carriage of ECDIS is compulsory, is it company policy for the ECDIS to be type-approved according to Res A 817 (19) as amended by MSC 64 (67) and MSC 86 (70) or MSC 232 (82)2																		
	217.3	Is it company policy that an acceptable back-up arrangement is in place? (an independent type-approved ECDIS with an independent position fixing system using official Electronic Navigation Charts (or a combination of official ENCs and RNCs) or a full / reduced folio of up-to-date paper charts, as relevant to the ship's voyage)																		
		Training & Onboard Use of ECDIS (Compulsory carriage of ECDIS)																		
	217.5	Is it company policy that all officers and masters who will use an ECDIS for primary navigation must complete generic training based on the IMO model course 1.27?																		
	217.7	Is it company policy that a risk assessment is carried out for the operation of ECDIS which identifies and controls the hazards when using ENCs and (if used) when ECDIS is in RCDS mode?																		
	217.9	Is the risk assessment and relevant onboard procedures + instructions reviewed on a regular basis (at least once a year or if circumstances require a review) ?																		
	218	Noise Levels On Board Ships																		
		(Only applicable to new ships (ships contracted to build on or after 1st July 2014) of a gross tonnage of 1,600 and above.)																		
	218.1	Is it company policy that the ships are surveyed for the measurement of noise level and the results recorded in the noise survey report in accordance with the Res MSC.337(91)?																		
	218.2	Is it company policy to identify areas of the vessels based on the noise levels and to place relevant visible warning notices at the entrance to these areas? (IMO noise symbols)

		C. Additional Questions																				
		Exhaust Gas Cleaning System (EGCS)																				
:	5420.13	Does the company use the requirements of Scheme B* (continuous emission monitoring with parameter checks) for testing, survey, certification and verification of EGC systems on board all its ships having such systems (EGC)? * Under scheme B, the SOx emissions compliance plan (SECP) should present how the continuous monitoring of ship exhaust gas emissions will demonstrate that the total SO2(ppm)/CO2(%) ratio is comparable to the requirements of 14.1 and/or 14.4 of MARPOL Annex 6. * Ships should be in possession of EGC technical manual, scheme B (ETM-B).)	20
:	5420.14	Are negative test results from the continuous monitoring of wash water discharge collected from the ship and addressed by the company? *The wash water discharge criteria have been set out in MEPC.259 (68).)	10
	5420.16	Does the company take adequate measures to avoid breakdown of the EGCS unit? Measures should include (all of) the following: 1. Material requisitions 2. Redundancy 3. Risk of condensation 4. Safety process regarding handling and storage of caustic soda. 5. Noise prevention 6. Contingency plan for failure 7. Remote monitoring 8. Technical support from the manufacturer (Telephone helpline)																				20
	5420.20	Does the company's PPE matrix include handling of caustic soda for closed-loop scrubbers?)	5
	5420.21	Does the company provide relevant crew with manufacturer training course for the EGC unit?																				5
_					Mini	mum	rank	ing c	core re	auiro		al scor		- 20)	120
	5421	Ships required to carry out Fuel Change Over to low sulphur MARINE DIESEL OIL or low sulphur MARINE GAS OIL (low sulphur Distillates)				mun	0	ing s		quire		enen		- 20								
	5421.1	Has the company carried out a safety assessment with respective manufacturers, for any necessary modifications to the vessel's boilers and each fuel system onboard? (modifications should be class approved))	30
	5421.2	Does company policy require updated fuel change over procedures (company approved) to be available onboard for the main engine, auxiliary engines and boilers? (procedures should be available for each fuel type used onboard)																				10

0	Indicates which crew/employee may be interviewed/questioned.]			
	Shows that a certain item is complied.				
	Shows that a certain item is <i>not</i> complied.				
		1			

Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply. Indicates that the minimum score for the relevant element is "0", hence a finding will *not* be issued.

Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.

Indicates that an alternative is used, hence the score for that item is a "0".

The checklist was filled in incorrectly, thus shows "error".

ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS

IMO GLOMEEP Website

GA Code: Certificate Holder name: Date of Office Audit:

MACHINERY TECHNOLOGIES

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic auto-tuning, batteries and other solutions.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10-15% slower than design speed
	Engine performance optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	<u>Hybridization (plug-in or</u> conventional)	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

PROPULSION AND HULL IMPROVEMENTS

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels
	Hull coating	Reduction of the hull's resistance through water	Mature	All vessels
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels

ENERGY CONSUMERS

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	<u>Cargo handling systems</u> (Cargo discharge operation)	Reduction of energy consumption while discharging crude oil by use of model- based studies of the discharge operation	Semi-mature	Tankers
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels

ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed	Not mature	Vessels with enough place on deck (general cargo, tankers, bulkers)
	<u>Flettner rotors</u>	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	<u>Combinator optimizing</u>	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature	Proven, new or existing technology/principle, with high uptake across the industry.
Comi moturo	Proven, new or existing technology/principle, but with limited uptake across the
Semi-mature	industry.
Not mature	New unproven-, unproven existing- , or proven existing technology/principle but
	with very few installations and little to no operational experience.

*This Information Portal is still under development and further images will be added.

This Energy Efficiency Technologies Information Portal was developed in cooperation with DNV GL.

	217.1	Is the ECDIS type-approved according to Res A 817(19) as amended by MSC 64 (67) and MSC 86 (70) or MSC.232(82)?																
	217.3	Is an acceptable back-up arrangement in place? (an independent type-approved ECDIS with an independent position fixing system using official Electronic Navigational Charts (ENC's), or a full / reduced folio of up-to-date paper charts as relevant to the ship's voyage)																
	217.4	Are all official ENCs up-to-date?																
		Alternative 2 (217.1 - 217.4): Compulsory carriage of ECDIS, Navigation with official ENCs where available and official RNCs where ENCs are not available																
	217.1	Is the ECDIS type-approved according to Res A817 (19) as amended by MSC 64 (67) and MSC 86 (70) or MSC.232(82)?																
	217.2	Is the supplementary folio of paper charts acceptable for that part of the voyage where official RNCs are used ?																
	217.3	Is an acceptable back-up arrangement in place? (an independent type-approved ECDIS with an independent position fixing system using official ENCs and Raster Navigational Charts where needed, or a full / reduced folio of up-to-date paper charts, as relevant to the ship's voyage)																
	217.4	Are all official ENCs and RNCs up-to-date?																
_		Training & Onboard Use of ECDIS (Compulsory carriage of ECDIS)																
	217.5	Have all deck officers and the master completed generic training in the use of ECDIS based on the IMO model course 1.27?																
	217.7	Is a risk assessment carried out for the operation of ECDIS which identifies and controls the hazards when using ENCs and (if used) when ECDIS is in RCDS mode?																
	217.8	Are results from the assessment evident in the onboard procedures + instructions for ECDIS?																
_	217.9	Is the risk assessment and relevant onboard procedures + instructions reviewed on a regular basis (at least once a year or if circumstances require a review) ?

LEGEND

0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is <i>not</i> complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

* for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/ Download".

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS

GA Code: Ship name: Date of Ship Survey:

MACHINERY TECHNOLOGIES

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic auto-tuning, batteries and other solutions.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10- 15% slower than design speed
	Engine performance_ optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance_ optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	<u>Hybridization (plug-in or</u> conventional)	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

PROPULSION AND HULL IMPROVEMENTS

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels
	Hull coating	Reduction of the hull's resistance through water	Mature	All vessels
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels

ENERGY CONSUMERS

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	<u>Cargo handling systems</u> (Cargo discharge operation)	Reduction of energy consumption while discharging crude oil by use of model- based studies of the discharge operation	Semi-mature	Tankers
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels

ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed	Not mature	Vessels with enough place on deck (general cargo, tankers, bulkers)
	<u>Flettner rotors</u>	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	Combinator optimizing	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature	Proven, new or existing technology/principle, with high uptake across the industry.
Semi-mature	Proven, new or existing technology/principle, but with limited uptake across the
Semi-mature	industry.
Not mature	New unproven-, unproven existing- , or proven existing technology/principle but
	with very few installations and little to no operational experience.

*This Information Portal is still under development and further images will be added.

This Energy Efficiency Technologies Information Portal was developed in cooperation with DNV GL.

	8102.7	Workshop	Safety instructions near machinery (Grindstone, Lathe etc)	
	8103	Main Propulsion		
	8103.1	Exhaust gas lines	Leakage / condition of lagging, black spots and stripes / loose lagging	
		Fuel lines H.P. & L.P.	H.P. pipes condition of protecting pipe/cover, L.P. pipes check leakage and heating tracings	
	8103.3	Cleanliness of cylinder heads	Fuel oil, cooling water, lub. Oil and exhaust gas leaks	
	8103.4	Instructions on emergency stand	Are there clear instructions available for changing over from normal to emergency conditions	
		Condition of controllers / thermo couples & wiring	Loose wires, open doors of controllers	
		Fuel oil system	Filters for leakage, purifiers cleanliness, area around purifiers	
		Lub. Oil system	Filters and safealls, purifiers condition	
		Starting air system	Condition of starting air lines and valves	
		Cooling water system	Condition of expansion bellows	
	8104	Auxiliary Engines		
		General performance		
		Leakage, condition of fuel oil, lub. oil lines	Cracks, corrosion and / or pipes connections not tight	
	8104.3		Oil-, water-, corrosion- and dirt-free	
	8104.4	Emergency Generator	Condition and date last tested	
	8105	Boilers		
		Steam or Thermal oil		
		Condition of burner front	Oil leakage, and air leakage	
		Lagging / isolation of fuel and steam lines	Condition of lagging	
		Thermal Oil	Check possible leakages bellows / quick closing valves	
	8105.5	Boiler bilge / Save-all	Oil-, water-, corrosion- and dirt-free	

	Green Award Visual Inspection - Container Carrier			
Check Box	Norm item	GREEN AMARD	Inspection Focus	Remarks
	8100	Machinery		
	8106	Bilge System		
	8106.1	Cleanliness of bilges on every platform	Presence of oil, water, corrosion and / or dirt	
	8106.2	Bilge separator, position of all valves		
		In port overboard valve sealed		
		Condition and record regarding oily-bilge separator	Check Oil Record Book - Machinery Space Operations	
		Bilge alarms	Alarms high level & high-high level in good condition	
		Emergency Bilge Suction valve	Check condition / last time tested	
	8106.7	Double bottom sounding pipes	Check functioning self closing valves	
	8107	Piping Systems		
	8107.1	General condition	Check for leakage and / or temporary repairs	
	8107.2	Condition of piping supports	Check for corroded, broken and / or missing supports	
	8108	General Service Air Systems		
	8108.1	Condition of air and oil drains	Check good working	
	8108.2	Condition of pipe lines	Check for leakage and / or temporary repairs	
	8108.3	Condition of safety valves	Check free movement	
	8109	Chemicals		
	8109.1	Sufficient Personal Protecting Equipment available	Near storage place and users place	
		Sufficient signboards available	Near storage place and users place	
	8109.3	Storage of chemicals according safety rules	According makers safety instructions	
	8110	Electrical		
	8110.1	Generator inspections during operation max. load		
		Examination of cables without attachments	Cable supports bulkhead and deck penetrations	
	8110.3	Electrical equipments in acc. with danger zones	Zeners barriers etc.	
	8112	Sewage Plant		
	8112.1	Sewage Plant fully operational	Alarms, level switches etc.	
		Position of valves correct	Check if the by-pass valves are closed	
	8113	Fire Pumps		
		Position of firepump valves	Are instructions available for position of valves	
		General check of emergency firepump	Position of Fuel valve, Content of fuel tank etc.	
		Operating instructions of firepump and drive-unit	Clear instruction board available	
	8114	Emergency Electrical Stops		
	-	Emergency stops of general service pumps	Last time tested	
		Emergency stops of steering gear pumps	Last time tested	
		Emergency stops of fans	Last time tested	

	Green Award Visual Inspection - Container Carrier			
Check Box	Norm item	OREEN AWARD	Inspection Focus	Remarks
	8100	Machinery		
	8115	Quick Closing Valves		
	8115.1	Condition of closing valve station	Check for clear instructions	
	8115.2	Condition of closing valves E.R.	Check for obstructions or other objects	
	8116	Gauge Glasses Class		
	8116.1	Condition of gauge glasses closing valves	Check proper working and if they are normal closed	
	8116.2	Condition gauge glasses lub. oil tanks	Check proper working and if they are normal closed	
		Condition gauge glasses chemical tanks	Check proper working and if they are normal closed	
		Condition gauge glasses fuel tanks	Check proper working and if they are normal closed	
		Ventilation		
		Fire flaps in trunks engine room	Check markers open/close and proper working	
	8117.2	Fire flaps	Check proper working	
	8118	Exhaust gases of machinery		
	8118.1	Emission of main engines	Content NOX en SOX	
	8200	Steering Gear		
	8201	SOLAS requirements		
	8201.1	Steering gear unit complies with SOLAS		
	8201.2	Steering gear room complies with SOLAS		
	8202.3	Steering gear unit - and room cleanliness	Check for hydraulic leaks, presence of water and / or oil in drip-trays	
	8203	Change over procedures		
	8203.1	Emergency steering gear change over procedures	Signs posted with instructions for emergency change-over	
	8203.2	Procedures for emergency change-over visible	Clearly visible near controls of steering gear unit	
	8204	Testing		
	8204.1	Emergency-steering tested recently	Check records in engine / deck logbook	
	8204.2	Steering Gear	Check records in engine / deck logbook. Testing before arrival and departure.	
	8205	Charging emergency header tank		
	8205.1	Emergency header tank fully charged		
	8205.2	Fixed storage tank installed		
	8206	Compass		
		Compass present in steering gear room		
	8206.2	Compass clearly visible from control-station		

	Green Award Visual Inspection - Container Carrier			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	8207	Bridge Communications		
		Satisfactory communications with bridge		
		Telephone available and working		
	8207.3	Sound powered telephone available and working		
	8200	Steering Gear		
	8207	Visibility of Rudder Angle Indicator		
	8207.1	Rudder angle indicator present		
	8207.2	Rudder angle indicator visible at steering position		
	8208	Access to Steering Gear		
	8208.1	Entrance door to steering gear room closed	Door to be kept closed at all times and not lashed or blocked in open position	
	8208.2	Access to steering gear unit unobstructed	Steering gear room should be uncluttered with easy access to all components of the system	
		Safety and protection measures fitted	Vessels > 10.000 GT should have railings around the steering gear and deck non-slip surface	
	8208.4	Bilge alarms	Alarms high level & high-high level in good condition	
	8300	Ballast System		
	8301	Drawings / Diagrams in Cargo Control Room		
	8301.1	All relevant drawings and diagrams available	Pipe Line diagrams, mimic diagrams etc should be available in CCR	
	8301.2	Drawings visible inside CCR	Drawings clearly visible and understandable for operation	
	8302	Functioning of Ballast Pumps		
		Is every separate pump working		
		Ballast pumps with temperature sensors readout CCR		
	8302.7	Is all equipment combined working	Malfunctioning often indicator	
	8303	Functioning Pump Controls		
		Pump controls functioning	Speed sensor, suction meter, pressure meter, vibriation meter	
		Pump alarms functioning	Temp. of bearings and casing	
<u> </u>		Regular tests conducted		
—		Tests recorded		_
	8304	Gauges and Tachometers		
		Ballast pump gauges operational		
		Ballast pump tachometers operational		
	8300	Ballast System		
	8307	Meters / Displays Inside EngineRoom Class		
		Suction and discharge pressure meters	Check for good working	
	8307.3	Thermometers of bearings / pump casing	Check for good working	

	Green Award Visual Inspection - Container Carrier			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	8400	Structural		
	8401	Drawings		
	8401.1	Review of all relevant structural drawings	Overview structural design and scantlings	
	8402	Reports		
		Classification reports	Survey reports with thickness readings, recommendations and conditions of class, repairs	
	8402.2	Flag State reports	Survey reports, recommendations	
	8402.3	Company Reports	Inspection reports, repair, maintenance and dry-dock reports by ship's staff and superintendents	
	8402.5	Other reports	Vetting reports by chartering companies and independent surveyors	
	8403	External Hull		
	8403.1	Shell plating	Check for indents, cracks, corrosion, pitting, paint-condition, local rust and / or cargo stripes	
	8404	Cargo Holds		
	8404.1	Structural integrity	Deformations, cracks, leakages of bulkheads, stringers, webs, girders	
	8404.2	Corrosion condition	Corrosion and / or corrosion pattern of structural design	
	8404.3	Corrosion protection system	Condition of coating	
	8404.4	Pipelines and valves	Condition pipes, supports, coupling, flanges, deformations and leakages	
	8405	Ballast Tanks		
	8405.1	Structural integrity	Deformations, cracks, leakages of bulkheads, stringers, webs, girders	
		Corrosion condition	Corrosion and / or corrosion pattern of structural design	
		Corrosion protection system	Condition of coating and / or sacrificial anodes	
		Pipelines and valves	Condition pipes, supports, coupling, flanges, deformations and leakages	
		Miscellaneous equipment	Condition ballast pumps, ballast control, access facilities	
	8400	Structural		
	8406	Void spaces / Cofferdams		
		Structural integrity	Deformations, cracks, leakages of bulkheads, stringers, webs, girders	
		Corrosion condition	Corrosion and / or corrosion pattern of structural design	
		Corrosion protection system	Condition of coating and / or sacrificial anodes	
		Pipelines and valves	Condition pipes, supports, coupling, flanges, deformations and leakages	
	8404.5	Miscellaneous equipment	Condition emergency pumps / controls, access facilities	

	Green Award Visual Inspection - Container Carrier				
Check Box	Norm item	CREEN AWARD	Inspection Focus	Remarks	
	8407	Main Deck & Fittings			
		Deck plating - Deformations	May indicate problems from underneath, stiffeners or underneath deck-plating		
		Deck plating - Fractures	May indicate substantial corrosion and / or local stress areas		
		Deck plating - Damages	Caused by collisions		
		Deck plating - Corrosion	If substantial indicate pattern, density and locations		
 		Deck openings	Condition check of covers and closing devices		
		Pipeline couplings, flanges, branches and supports	Condition check, deformation, cracks, corrosion, thightness		
		Ventilation - pipes / ducts	Condition check of covers, closing devices, flame screens, floating locks		
	8407.10	Bunker connections			
		Permanent drip-trays on open deck where spills may occur			
	8407.13	Are these drip-trays clean and properly closed			
	8400	Structural			
	8407.29	Bunker and oil tank derating pipes	Check flame screens and coamings		
	8410	Accomodation & Machinery Spaces			
	8410.1	Structural integrity	General condition, damages & defects		
	8410.2	Doors, windows, ventilation ducts, closing devices	Condition check and water tightness		
		Stairs and platforms	Condition check, corrosion / deformations		
		Pipelines, valves, couplings, overboard connection	Condition check		
		Safety equipment	Condition check CO2, extinguishers, fire hoses, alarms etc.		
	8410.6	Certificates for safety equipment			
	8411	Mooring equipment			
	8411.1	Mooring lines	Condition mooring lines		
	8411.2	Winches	Foundation bolts firm, casing crack-, corrosion-free, no leakages and save-all		
	8411.3	Condition winch-brakes	Check last test report and thickness linings		
	8412	Anchoring equipment			
		Anchors, anchor shackles and chain	Wear, corrosion, clearances inside hawser pipe		
	8412.2	Anchor winch and associated gear	Foundation, no leakages, condition of brakes, hinges and hinge plates		
	8412.3	Anchor securing	Condition and workable		
	8500	Safety / Rescue			
	8501	Safety equipment			
		Certificates	Check certificates, reports and safety drills		
	8501.2	Safety plan	Check available and clearly visible		

	Green Award Visual Inspection - Container Carrier			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks

		Life boat + davits	Check condition (incl. Kathodic wear) and working order	
	8502.2	Rescue boat + davits	Check condition (incl. Kathodic wear) and working order	
		Life rafts + release system	Check condition (incl. Kathodic wear) and working order	
		Accommodation ladders, pilot ladders and gangway	Check condition and working order	
		Life jackets	Check condition and working order	
	8502.7	Life buoys	Check condition (incl. Kathodic wear) and working order	
	8503	Fire fighting		
	8503.1	CO2	Pressure gauges / indicators on bottles / pipelines / nozzles	
		Foamtank	Content / Filling	
		Foam monitors on deck	Check condition and working order	
		Fire control plans	Check available and clearly visible	
		Portable fire extinguishers	Check ready for use, last check date	
		Fireman's outfit	Check ready for use, easy accessable	
		Breathing Apparatus charging compressor	Check ready for use, easy accessable	
		International Ship/Shore Fire connection	Check available both sides	
		Fire alarm system and detectors	Check test records, condition in accommodation, ER and boiler room	
	8503.10	Fire flaps and vent stops	Check condition on deck, accommodation, ER and boiler room and clearly marked	
		Fire lines	Check condition on deck, accommodation, ER and boiler room	
		Fire hoses	Check condition on deck, accommodation, ER and boiler room	
		Fire system for scavenging air receiver and boiler front	Check condition and working order separate fire fighting system	
	8504	Escape routes		
		Free access	Check free access without obstructions	
		Indicators	Check clear markers / positioning	
		Emergency lighting	Check clear markers / positioning	
	8505	Oil Spill Response Equipment		
		Oil Pollution Emergency Plan	Check availability	
	8505.2	Emergency equipment	Check content and working order
