# Annex 3g: Green Award Requirements (Offshore Supply Ship) Version 2023

Checklists for Office Audits and Ship Surveys

Effective as of 1 March 2023

# Annex 3g: Green Award Requirements Offshore Supply Ship

### **Offshore Supply Ship**

#### Table of contents

Appen- dix	Subject	Doc. Nr.	Effective date	Total pages
1	Checklist <b>Basic</b> Criteria - Office audit - Offshore Supply	OMC-06	01/03/2023	3
2	Checklist <b>Ranking</b> Criteria - Office audit - Offshore Supply	OMC-07	01/03/2023	9
	Checklist Ranking Criteria - Office audit - Total Score Review		01/03/2023	38
3	Checklist <b>Basic</b> Criteria - <u>Ship survey</u> - Offshore Supply	OMC-08	01/03/2023	43
4	Checklist <b>Ranking</b> Criteria - <u>Ship survey</u> - Offshore Supply	OMC-09	01/03/2023	48
	Checklist <b>Ranking</b> Criteria - <u>Ship survey</u> - Total Score Review		01/03/2023	74
5	Checklist <b>Visual</b> Inspection - <u>Ship survey</u> - Offshore Supply	OMC-10	01/03/2023	81

#### Legend for Checklists

0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is not complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

\* for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/Download".

#### **Revision codes**

- RN Item/question is renumbered
- RR Rating score of item/question is changed
- N New item or question
- D Item/question is deleted
- M Text of item/question is modified

	3200	Fuel oil management		_		_		_	_						_	_			_				_	
		A. Contracting / Procurement																						
	3200.14	N/A in case charterer is responsible for supplying bunkers (for all GA ships) Is it company procedure that bunker purchasing contracts state that the fuel oil be supplied with reference to ISO 8217 specifications ( <u>latest edition is recommended</u> )?																				0	10	
	3200.15	N/A in case owner / manager or third party ship manager is responsible for purchasing bunkers (for all GA ships) Is it company procedure that the technical requirements of the ship and optimal fuel oil specifications are communicated to the charterer for their consideration?																				0	10	
		Is an evaluation of all fuel oil suppliers carried out to identify "quality-oriented fuel oil suppliers" before signing the bunker purchasing contract with a chosen supplier and are the negative results brought to the attention of the charterer (where applicable)?																				0	10	
		B. Sampling & Testing																						
		B.1 MARPOL delivered fuel oil sampling																						
	3200.11	Is it company policy that fuel oil sampling (during bunkering) is carried out using an automatic sampler (time or flow proportional) in accordance with Marpol Annex VI?																				0	10	
		B.2 In-use fuel oil sampling																						
	3200.16	Is it company policy that fuel oil samples are drawn from the following designated sampling points at least once every four months for testing of catalytic fines & separator efficiency at a recognized fuel analysis organization ashore? 1. at engine inlet 2. before separator 3. after separator																				0	10	
		B.3 Testing																						
	3200.1	Is it company procedure that bunkered fuel oil is <u>always</u> tested (before use onboard) by a recognized fuel analysis organization ashore in accordance with the requirements of ISO 8217 standard (same edition for which the fuel was ordered)?																				0	40	
		C. Operational procedures																						
	3200.17	Does the company prohibits its ships to commingle two different bunkers (even of the same grade of fuel)?																				0	10	
	3200.18	For the situations where commingling of two different fuels is unavoidable, does the company have commingling procedure explaining the steps to be followed to determine the compatibility of two bunkers (including the reference test methods)?																				0	5	
		D. Additional questions																						
	3200.5	Are global bunker quality alerts received from company fleet experience and fuel analysis organisation shared with relevant ships by issuing technical bulletins or circulars?																				0	10	
	3200.19	Is it company procedure that bunker suppliers are asked to provide the copies of the product's valid certificate of quality (COQ) and associated laboratory analysis reports verifying the details on the COQ?																				0	5

LEGEND

0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is <i>not</i> complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

\* for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/ Download".

#### SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

## ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS

IMO GLOMEEP Website

## MACHINERY TECHNOLOGIES

GA Code: Certificate Holder name: Date of Office Audit:

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic auto-tuning, batteries and other solutions.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10- 15% slower than design speed
	Engine performance optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	<u>Hybridization (plug-in or</u> <u>conventional)</u>	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

#### **PROPULSION AND HULL IMPROVEMENTS**

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels
	Hull coating	Reduction of the hull's resistance through water	Mature	All vessels
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels

#### **ENERGY CONSUMERS**

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Cargo handling systems (Cargo discharge operation)	Reduction of energy consumption while discharging crude oil by use of model- based studies of the discharge operation	Semi-mature	Tankers
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels

#### ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed	Not mature	Vessels with enough place on deck (general cargo, tankers, bulkers)
	<u>Flettner rotors</u>	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

#### TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	Combinator optimizing	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature	Proven, new or existing technology/principle, with high uptake across the industry.
Comi moturo	Proven, new or existing technology/principle, but with limited uptake across the
Semi-mature	industry.
Not mature	New unproven-, unproven existing- , or proven existing technology/principle but
	with very few installations and little to no operational experience.

LEGEND

LEGEI	
0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is <i>not</i> complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

\* for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/ Download".

## ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS

IMO GLOMEEP Website

GA Code: Ship name: Date of Ship Survey:

## MACHINERY TECHNOLOGIES

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic auto-tuning, batteries and other solutions.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10- 15% slower than design speed
	Engine performance optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	<u>Hybridization (plug-in or</u> <u>conventional)</u>	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

### **PROPULSION AND HULL IMPROVEMENTS**

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels
	Hull coating	Reduction of the hull's resistance through water	Mature	All vessels
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels

### **ENERGY CONSUMERS**

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Cargo handling systems (Cargo discharge operation)	Reduction of energy consumption while discharging crude oil by use of model- based studies of the discharge operation	Semi-mature	Tankers
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels

## ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed		Vessels with enough place on deck (general cargo, tankers, bulkers)
	<u>Flettner rotors</u>	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

### TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	Combinator optimizing	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature	Proven, new or existing technology/principle, with high uptake across the industry.
Comi moturo	Proven, new or existing technology/principle, but with limited uptake across the
Semi-mature	industry.
Not mature	New unproven-, unproven existing- , or proven existing technology/principle but
	with very few installations and little to no operational experience.

# **APPENDIX 5**

CHECKLIST - VISUAL INSPECTION - SURVEY - OFFSHORE SUPPLY SHIP

(OMC-10)

	Green Award Visual Inspection - Offshore Supply Ship				
Check Box	Norm item	CREEN AWARD	Inspection Focus	Remarks	
	10100	Machinery			
	10101	Reports			
		Classification reports	Survey reports with recommendations and conditions of class, repairs		
	10101.2	State Authority reports	Survey reports, recommendations		
	10101.3	Company Reports	Inspection, repair, maintenance, planning, dry-dock reports by ship's staff and superintendents		
		Inspection guidelines	Guidelines on the means of access to structures for inspection and maintenance of bulkers		
		Other reports	Vetting reports by chartering companies and independent surveyors		
T		Engine Room			
T		Overall tidyness of E.R. space	Unsecured and loose material, tools and E.R. spare-parts		
		General cleanliness of E.R.	Oil- & gas-free enviroment	1	
	10102.3	Storage E.R. equipment	Equipment stored at designated places		
	10102.4	Handling of general E.R. waste	General waste stored & handled properly		
	10102.5	Indication of E.R. emergency escapes	Clearly visible and not obstructed		
	10102.6	Save-alls	Oil, liquid and dirt free		
	10102.7	Workshop	Safety instructions near machinery (Grindstone, Lathe etc)		
	10103	Main Propulsion			
	10103.1	Exhaust gas lines	Leakage / condition of lagging, black spots and stripes / loose lagging		
	10103.2	Fuel lines H.P. & L.P.	H.P. pipes condition of protecting pipe/cover, L.P. pipes check leakage and heating tracings		
	10103.3	Cleanliness of cylinder heads	Fuel oil, cooling water, lub. Oil and exhaust gas leaks		
	10103.4	Instructions on emergency stand	Are there clear instructions available for changing over from normal to emergency conditions		
		Condition of controllers / thermo couples & wiring	Loose wires, open doors of controllers		
		Fuel oil system	Filters for leakage, purifiers cleanliness, area around purifiers		
	10103.7	Lub. Oil system	Filters and save-alls, purifiers condition		
T	10103.8	Starting air system	Condition of starting air lines and valves		
T		Cooling water system	Condition of expansion bellows		
Ť		Auxiliary Engines			
T		General performance			
T		Leakage, condition of fuel oil, lub. oil lines	Cracks, corrosion and / or pipes connections not tight		
		Auxiliary Engine bilge	Oil-, water-, corrosion- and dirt-free		
T		Emergency Generator	Condition and date last tested		
		Boilers			
T	10105.1	Steam or Thermal oil			
T		Condition of burner front	Oil leakage, and air leakage		
T		Lagging / isolation of fuel and steam lines	Condition of lagging		
		Thermal Oil	Check possible leakages bellows / quick closing valves	1	
-	10105 5	Boiler bilge / Save-all	Oil-, water-, corrosion- and dirt-free	1	

	Green Award Visual Inspection - Offshore Supply Ship				
Check Box	Norm item	GREEN AMARD	Inspection Focus	Remarks	
	10100	Machinery			
		Bilge System			
		Cleanliness of bilges on every platform	Presence of oil, water, corrosion and / or dirt		
		Bilge separator, position of all valves			
		In port overboard valve sealed			
		Condition and record regarding oily-bilge separator	Check Oil Record Book - Machinery Space Operations		
		Bilge alarms	Alarms high level & high-high level in good condition		
		Emergency Bilge Suction valve	Check condition / last time tested		
		Double bottom sounding pipes	Check functioning self closing valves		
		Ballast Pumps			
		Condition of pumps	Check functioning of pumps		
		Condition ballast-system	Functioning of all pumps combined		
		Condition supports	Corrosion, cracks, deformation of pump-supports		
		Piping Systems			
		General condition	Check for leakage and / or temporary repairs		
		Condition of piping supports	Check for corroded, broken and / or missing supports		
		General Service Air Systems			
		Condition of air and oil drains Condition of pipe lines	Check good working Check for leakage and / or temporary repairs		
		Condition of safety valves	Check free movement		
		Chemicals			
		Sufficient Personal Protecting Equipment available	Near storage place and upper place		
		Sufficient signboards available	Near storage place and users place		
		Storage of chemicals according safety rules	Near storage place and users place According makers safety instructions		
		Electrical			
	-	Generator inspections during operation max. load			
		Examination of cables without attachments	Cable supports bulkhead and deck penetrations		
		Electrical equipments in acc. with danger zones	Zeners barriers etc.		
		Inert Gas Plant (optional)			
		Inert Gas system fully operational			
		Condition of all instrumentation	Special O2 meter		
	-	Condition of all alarms and trips	High and low level alarms etc.		
		Sewage Plant			
		Sewage Plant fully operational	Alarms, level switches etc.		
		Position of valves correct	Check if the by-pass valves are closed		

	Green Award Visual Inspection - Offshore Supply Ship				
	Norm item	GIREEN AWARD	Inspection Focus	Remarks	
	10100	Machinery			
	10114	Fire Pumps			
	10114.1	Position of firepump valves	Are instructions available for position of valves		
	10114.2	General check of emergency firepump	Position of Fuel valve, Content of fuel tank etc.		
	10114.3	Operating instructions of firepump and drive-unit	Clear instruction board available		
	10115	Emergency Electrical Stops			
	10115.1	Emergency stops of general service pumps	Last time tested		
Ī		Emergency stops of steering gear pumps	Last time tested		
		Emergency stops of fans	Last time tested		
	10116	Quick Closing Valves			
		Condition of closing valve station	Check for clear instructions		
		Condition of closing valves E.R.	Check for obstructions or other objects		
	10117	Gauge Glasses			
		Condition of gauge glasses closing valves	Check proper working and if they are normal closed		
		Condition gauge glasses lub. oil tanks	Check proper working and if they are normal closed		
		Condition gauge glasses chemical tanks	Check proper working and if they are normal closed		
	10117.4	Condition gauge glasses fuel tanks	Check proper working and if they are normal closed		
	10118	Ventilation			
	10118.1	Fire flaps in trunks engine room	Check markers open/close and proper working		
		Fire flaps	Check proper working		
	10119	Exhaust gases of machinery			
	10119.1	Emission of main engines	Content NOX en SOX		
T	10200	Steering Gear			
	10201	SOLAS requirements			
╈		Steering gear unit complies with SOLAS			
		Steering gear room complies with SOLAS			
1		Steering gear unit - and room cleanliness	Check for hydraulic leaks, presence of water and / or oil in drip-trays		
╈	10202	Change over procedures	A set of		
	10202.1	Emergency steering gear change over procedures	Signs posted with instructions for emergency change-over		
		Procedures for emergency change-over visible	Clearly visible near controls of steering gear unit		
1	10203	Testing			
T	10203.1	Emergency-steering tested recently	Check records in engine / deck logbook		
1		Steering Gear	Check records in engine / deck logbook. Testing before arrival and departure.		

	Green Award Visual Inspection - Offshore Supply Ship				
CITECK DOX	Norm item	GREEN AMARD	Inspection Focus	Remarks	
	10200	Steering Gear			
	10204	Charging emergency header tank			
	10204.1	Emergency header tank fully charged			
	10204.2	Fixed storage tank installed			
	10205	Compass			
	10205.1	Compass present in steering gear room			
	10205.2	Compass clearly visible from control-station			
	10206	Bridge Communications			
	10206.1	Satisfactory communications with bridge			
		Telephone availabel and working			
	10206.3	Sound powered telephone available and working			
	10207	Visibility of Rudder Angle Indicator			
	10207.1	Rudder angle indicator present			
	10207.2	Rudder angle indicator visible at steering position			
	10208	Access to Steering Gear			
	10208.1	Entrance door to steering gear room closed	Door to be kept closed at all times and not lashed or blocked in open position		
	10208.2	Access to steering gear unit unobstructed	Steering gear room should be uncluttered with easy access to all components of the system		
	10208.3	Safety and protection measures fitted	Vessels > 10.000 GT should have railings around the steering gear and deck non-slip surface		
	10208.4	Bilge alarms	Alarms high level & high-high level in good condition		
	10300	(Cargo) / Ballast System			
	10301	Drawings / Diagrams Layout in Control Room			
	10301.1	All relevant drawings and diagrams available	Pipe Line diagrams, mimic diagrams etc should be available		
		Drawings visible	Drawings clearly visible and understandable for operation		
		Loading manual / history reports	Check for typical loading / unloading sequences		
	10302	Functioning of (Cargo) / Ballast Pumps			
	10302.1	Is every separate pump working			
	10302.2	Ballast pumps with temperature sensors			
	10302.3	Is all equipment combined working			
	10303	Meters / Displays inside control room			
	10303.1	Hull bending / Shear force indicator (*)	Check of working, approved and commonly used		
		Loading instrument	Check of working, approved and commonly used		

	Green Award Visual Inspection - Offshore Supply Ship				
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks	
	10400	Structural			
	10401	Drawings			
	10401.1	Review of all relevant structural drawings	Overview structural design and scantlings		
	10402	Reports			
	10402.1	Classification reports	Survey reports with thickness readings, recommendations and conditions of class, repairs		
		State Authority reports	Survey reports, recommendations		
		Company Reports	Inspection reports, repair, maintenance and dry-dock reports by ship's staff and superintendents		
	10402.4	Inspection guidelines	Guidelines on the means of access to structures for inspection and maintenance of oil tankers		
	10402.5	Other reports	Vetting reports by chartering companies and independent surveyors		
	10403	External Hull			
	10403.1	Condition shell plating	Check for indents, cracks, paint-condition / corrosion, pitting and / or cargo stripes		
	10403.2	Condition from deck to light-loadline	Check reverse side lower-end topside ballast tanks and intersection vertical frames		
	10403.3	Condition boottop and deep-loadline	Check reverse side upper-end double bottom ballast tanks and intersection vertical frames		
	10403.4	Condition deep-loadline and flat bottom	Check bilge keels for wrongl designs and bad welds		
	10403.5	Condition flat-bottom	Check reverse sides of longitudinal girders / transverse webs & transverse stools under bulkheads		
	10404	Cargo Hold			
	10404.1	General condition main-strength structure			
	10404.2	Condition shell frame	Check for cracks, leakages connecting brackets at upper - and lower side tanks		
	10404.3	Condition corrugated bulkheads	Check connection with upper- and lower stools		
	10404.4	Condition hatch-coamings	Checks connections hatch end beams and longitudinal hatch coamings		
		Condition corrosion protection systems	Check condition coating and / or sacrficial anodes		
		Corrosion locations	Locate corrosion on frames/brackets, shell-plating, tanktop, bilges, hopper-surfaces		
		Grab deformations / damage	Check for indents, cracks and / or deformations on all structural hold-parts		
		Shovel/hydraulic hammer deformations / damage	Check for deformations and / or damages near bulkheads,brackets,stringers,webs,girders		
		Condition access platforms, walkways and ladders	General condition of all supports (damages, corrosion and / or cracks )		
		Condition pipelines and valves	Check for leakages / corrosion, temporary repairs and patches ( also protection guards )		
		Bilge wells and strainer	Check content bilge and free of cargo		
		Cargo handling deck fittings and storage spaces			
		Condition of the cargo deck			
		Condition of chain lockers			
		Condition of mud tanks			
		Condition of shark jaw, towing pins and stern roller			
	10405.13	Condition of anchor and working winch

	10406	Ballast Tanks			
	10406.1	Condition structural integrity	Check main-strength members and general condition		
	10406.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages		
	10406.3	Condition webs	Check webs near connection with longitudinal at shell and bulkheads		
	10406.4	Condition brackets	Check connection brackets as support for transverse shell frames in cargo-holds		
	10406.5	Corrosion pattern	Locate corrosion in deckhead-, bulkhead ( near bunkers ) areas, bottom- and longitudinal-plates		
	10406.6	Condition pipelines and valves	Check for leakages and corrosion, temporary repairs and patches, hydraulic leaks overhead-area		
	10406.7	Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.		
	10408	Void Spaces / Cofferdams / Pipe duct			
	10408.1	Condition structural integrity	Check main-strength members, any non-continous structural material and general condition		
	10408.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages		
	10408.3	Corrosion pattern	Locate corrosion in deckhead-, bulkhead (near bunkers) areas, bottom- and longitudinal-plates		
	10408.4	Condition pipelines and valves	Check for leakages and corrosion, temporary repairs and patches, hyraulic leaks overhead-area		
	10408.5	Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.		
	10409	Bunker Oil Tanks			
	10409.1	Condition structural integrity	Check main-strength members, any non-continous structural material and general condition		
	10409.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages		
	10409.3	Corrosion pattern	Locate corrosion in deckhead-, bulkhead areas, bottom- and longitudinal-plates		
	10409.4	Condition pipelines and valves	Check for leakages and corrosion, temporary repairs and patches, hydraulic leaks overhead-area		
	10409.5	Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.		

	Green Award Visual Inspection - Offshore Supply Ship				
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks	
	10400	Structural			
	10410	Main Deck & Fittings			
	10410.1	Deck plating - deformations	May indicate problems from underneath, stiffeners or underneath deck-plating		
	10410.2	Deck plating - fractures	May indicate substantial corrosion and / or local stress areas		
	10410.3	Deck plating - damages	Caused by collissions and / or grab damage		
	10410.4	Coaming corners	Check corner areas and underneath bracket-supports for damage / corrosion		
	10410.5	Tank entrances and deck openings	Condition check covers and closing devices		
	10410.6	Pipeline couplings, flanges, branches and supports	Condition check, deformation, cracks, corrosion, tightness		
		Closing appliances for ventilation	Condition check covers and closing devices		
		Bunker and oil tank derating pipes	Check flame screens and coamings		
	10411	Accomodation & Machinery Spaces			
		Structural integrity	General condition, damages & defects		
	10411.2	Doors, windows, ventilation ducts, closing devices	Condition check and water tightness		
		Stairs and platforms	Condition check, corrosion / deformations		
		Pipelines, valves, couplings, overboard connection	Condition check		
	10411.5	Safety equipment	Condition check CO2, Halon system, extinguishers, fire hoses, alarms etc.		
	10411.6	Certificates for safety equipment			
	10412	Mooring equipment			
	10412.1	Mooring lines	Condition mooring lines		
		Winches	Foundation bolts firm, casing crack-, corrosion-free, no leakages and save-all		
	10412.3	Condition winch-brakes	Check last test report and thickness linings		
	10413	Anchoring equipment			
		Anchors, anchor shackles and chain	Wear, corrosion, clearances inside hawser pipe		
	10413.2	Anchor winch and associated gear	Foundation, no leakages, condition of brakes, hinges and hinge plates		
	10413.3	Anchor securing	Condition and workable
