Checklists for Office Audits and Ship Surveys

Effective as of 1 October 2025

Annex 3g: Green Award Requirements Offshore Supply Ship

Offshore Supply Ship

Table of contents

Appen- dix	Subject	Doc. Nr.	Effective date	Total pages
1	Checklist Basic Criteria - <u>Office audit</u> - Offshore Supply	OMC-06	01/10/2025	3
2	Checklist Ranking Criteria - Office audit - Offshore Supply	OMC-07	01/10/2025	9
	Checklist Ranking Criteria - Office audit - Total Score Review		01/10/2025	39
3	Checklist Basic Criteria - Ship survey - Offshore Supply	OMC-08	01/10/2025	44
4	Checklist Ranking Criteria - Ship survey - Offshore Supply	OMC-09	01/10/2025	49
	Checklist Ranking Criteria - <u>Ship survey</u> - Total Score Review		01/10/2025	74
5	Checklist Visual Inspection - Ship survey - Offshore Supply	OMC-10	01/10/2025	83

Legend for Checklists

0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is not complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will not be issued.

^{*} for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named

Revision codes

RN Item/question is renumbered

RR Rating score of item/question is changed

N New item or question

D Item/question is deleted

M Text of item/question is modified

CKL OSS / VERSION 2025 / 1.0 2 of 91

	Shows that a certain item is <i>not</i> complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will <i>not</i> be issued.

^{*} for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/ Download".

GA Code:

ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS Certificate Holder name:

IMO GLOMEEP Website Date of Office Audit:

MACHINERY TECHNOLOGIES

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic autotuning, batteries and other solutions.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10- 15% slower than design speed
	Engine performance optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	Hybridization (plug-in or conventional)	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

CKL OSS / VERSION 2025 / 1.0 41 of 91

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

PROPULSION AND HULL IMPROVEMENTS

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels
	Hull coating	Reduction of the hull's resistance through water	Mature	All vessels
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels

ENERGY CONSUMERS

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Cargo handling systems (Cargo discharge operation)	Reduction of energy consumption while discharging crude oil by use of model-based studies of the discharge operation	Semi-mature	Tankers
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels

CKL OSS / VERSION 2025 / 1.0 42 of 91

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed	Not mature	Vessels with enough place on deck (general cargo, tankers, bulkers)
	Flettner rotors	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	Combinator optimizing	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature Proven, new or existing technology/principle, with high uptake across the industry.

Proven, new or existing technology/principle, but with limited uptake across the Semi-mature

industry.

Not mature New unproven-, unproven existing- , or proven existing technology/principle but

with very few installations and little to no operational experience.

This Energy Efficiency Technologies Information Portal was developed in cooperation with DNV GL.

LEGEND

LEGEND	
0	Indicates which crew/employee may be interviewed/questioned.
	Shows that a certain item is complied.
	Shows that a certain item is <i>not</i> complied.
0	Indicates that an alternative is used, hence the score for that item is a "0".
	The checklist was filled in incorrectly, thus shows "error".
0	Indicates that the whole element did not reach the minimum score, hence a finding is issued. The number shows the scores obtained.
	Shows which elements are minimum = maximum. Hence scores on all items is required to fully comply.
	Indicates that the minimum score for the relevant element is "0", hence a finding will <i>not</i> be issued.

^{*} for detailed interpretations of the colours and the usage of the checklist, please refer to the pdf-file named "Instruction Notes" located on www.greenaward.org under "Certification/ Download".

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

GA Code:

ENERGY EFFICIENCY TECHNOLOGIES INFORMATION PORTAL

TECHNOLOGY GROUPS Ship name:

<u>IMO GLOMEEP Website</u> Date of Ship Survey:

MACHINERY TECHNOLOGIES

This technology group includes measures that improve the energy efficiency of main and auxiliary engines. These include measures such as auxiliary systems optimization, optimizing heat exchangers, waste heat recovery systems, electronic autotuning, batteries and other solutions.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Auxiliary systems optimization	Optimizing auxiliary systems to actual operational profiles, not design conditions	Semi-mature	All vessels
	Engine de-rating	De-rating an engine for reduction of the vessel's maximum speed to increase its efficiency by limiting the potential power output	Semi-mature	Vessels sailing 10- 15% slower than design speed
	Engine performance optimization (automatic)	Automatic increase of engine efficiency through testing and tuning according to actual operational load and conditions	Semi-mature	Mainly for two stroke engines
	Engine performance optimization (manual)	Manual increase of engine efficiency through testing and tuning according to actual operational load and conditions	Mature	All vessels
	Exhaust gas boilers on auxiliary engines	Exhaust gas boilers recover the heat from the exhaust gas of auxiliary engines to generate steam, hot water or heat for process heating	Semi-mature	Vessels without shaft generator
	Hybridization (plug-in or conventional)	Use of electricity to replace various modes of power consumption	Semi-mature	Vessels with large fluctuations in power output (ferries, offshore vessels, tugs)
	Improved auxiliary engine load	Increase of the auxiliary engines' load and efficiency by reducing the number of auxiliary engines running	Semi-mature	All vessels
	<u>Shaft generator</u>	Produce electricity from the main propulsion engine	Mature	All vessels with high power needs and long transits
	<u>Shore power</u>	Use of cold ironing in ports to reduce fuel consumption on power producing engines	Semi-mature	For smaller vessels and in ports with developed solutions for larger vessels
	Steam plant operation improvement	Improve operations and maintenance of steam plant system saving fuel on oil fired boiler	Mature	Mainly crude and product tankers
	Waste heat recovery systems	Recover thermal energy from the exhaust gas and convert it into electrical energy	Semi-mature	All vessels with engines above 10 MW

CKL OSS / VERSION 2025 / 1.0 80 of 91

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

PROPULSION AND HULL IMPROVEMENTS

Technologies in this group focus on improving the hydrodynamic performance of the vessel. This includes solutions that reduce the resistance of the vessel and/or also improve the propulsive efficiency of the vessel. Examples include measures such as propeller polishing, hull cleaning, PIDs (Propulsion Improving Devices), air lubrication and more.

Y?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY	
	Air cavity lubrication	Use of air injection on the wetted hull surfaces to improve a ship's hydrodynamic performance	Semi-mature	Most vessels in deep sea trade	
	Hull cleaning	Removal of fouling on the hull to increase the vessel's hydrodynamic performance	Mature	All vessels	
	Hull coating	Reduction of the hull's resistance through water Mature			
	Hull form optimization	Optimizing the hull for lower resistance through water	Mature	All vessels	
	Hull retrofitting	Retrofitting of the bulbous bow, optimizing thruster tunnels or bilge keel to reduce resistance	Mature	All vessels	
	Propeller polishing	Removal of fouling on the propeller	Mature	All vessels	
	Propeller retrofitting	Retrofitting the propeller to increase efficiency	Semi-mature	All vessels	
	Propulsion Improving Devices (PIDs)	Installation of propulsion improving devices	Mature	All vessels	

ENERGY CONSUMERS

Consumers are equipment or devices that use energy when operated. Technologies in this group focus on minimizing the energy consumption by improving the device or optimizing the utilization of the device. Examples of measures in this group are frequency controllers, cargo handling systems, low energy lighting and more.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY	
	Cargo handling systems (Cargo discharge operation)	ISemi-mature			
	Energy efficient lighting system	Use of energy efficient lighting equipment, such as LED light, to increase efficiency and remove heat loss from light devices	Mature	All vessels	
	Frequency controlled electric motors	Regulating the frequency of the motors in order to adapt the motor optimized load	Mature	All vessels	

CKL OSS / VERSION 2025 / 1.0 81 of 91

SUPPLEMENT TO 5440 GHG EMISSIONS - CO2

ENERGY RECOVERY

Technologies in this group focus on capturing energy from the surroundings of the vessel and using or transforming this to useful energy for the vessel. This involves measures such as application of kites, fixed sails or wings, Flettner rotors, or solar panels.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Fixed sails or wings	Use sails or wings to replace some of the propulsion power needed	Not mature	Vessels with enough place on deck (general cargo, tankers, bulkers)
	Flettner rotors	Use Flettner rotors to generate power from wind energy	Not mature	Dependent on trading area and sufficient free deck-surface
	<u>Kite</u>	Use a kite to replace some of the propulsion power needed	Not mature	All vessels
	<u>Solar panels</u>	Install solar panels for conversion of solar energy to electricity	Not mature	Dependent on trading area and sufficient free deck-surface

TECHNICAL SOLUTIONS FOR OPTIMIZING OPERATION

Technologies in this group focus on improving the operation of the vessel more than improving the vessel itself. The list of suggested measures includes both technologies and suggestions for best practice (without direct application of a technology). Measures in this group include trim and draft optimization, speed management, autopilot adjustment and use, combinator optimizing, and others.

Υ?	NAME	FUNCTION	TECHNICAL MATURITY*	APPLICABILITY
	Autopilot adjustment and use	Use of an automatic system to control the vessel's rudder in a more energy efficient manner	Mature	All vessels
	Combinator optimizing	Use of optimized pitch settings and propeller speed for optimized efficiency of propulsion system	Mature	For vessels with controllable pitch propeller
	Efficient DP Operation	Optimize the operation in DP mode	Semi-mature	Vessels with DP mode
	Speed management	Management of the vessel's speed in the most efficient manner	Semi-mature	All vessels
	Trim and draft optimization	Optimizing the trim and draft to reduce the vessel's water resistance	Semi-mature	All vessels
	Weather routing	Including weather conditions when planning a voyage	Mature	All vessels

Definitions of maturity levels according to uptake across the maritime industry, and degree of proven technology/principle

Mature Proven, new or existing technology/principle, with high uptake across the industry.

Semi-mature Proven, new or existing technology/principle, but with limited uptake across the

industry.

Not mature New unproven-, unproven existing- , or proven existing technology/principle but

with very few installations and little to no operational experience.

This Energy Efficiency Technologies Information Portal was developed in cooperation with DNV GL.

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREN AWARD	Inspection Focus	Remarks
	10100	Machinery		
	10106	Bilge System		
		Cleanliness of bilges on every platform	Presence of oil, water, corrosion and / or dirt	
		Bilge separator, position of all valves		
		In port overboard valve sealed		
		Condition and record regarding oily-bilge separator	Check Oil Record Book - Machinery Space Operations	
	10106.5	Bilge alarms	Alarms high level & high-high level in good condition	
		Emergency Bilge Suction valve	Check condition / last time tested	
		Double bottom sounding pipes	Check functioning self closing valves	
		Ballast Pumps		
		Condition of pumps	Check functioning of pumps	
		Condition ballast-system	Functioning of all pumps combined	
		Condition supports	Corrosion, cracks, deformation of pump-supports	
		Piping Systems		
		General condition	Check for leakage and / or temporary repairs	
		Condition of piping supports	Check for corroded, broken and / or missing supports	
		General Service Air Systems		
		Condition of air and oil drains	Check good working	
		Condition of pipe lines	Check for leakage and / or temporary repairs	
		Condition of safety valves	Check free movement	
		Chemicals		
		Sufficient Personal Protecting Equipment available	Near storage place and users place	
		Sufficient signboards available	Near storage place and users place	
		Storage of chemicals according safety rules	According makers safety instructions	
		Electrical		
		Generator inspections during operation max. load		
		Examination of cables without attachments	Cable supports bulkhead and deck penetrations	
		Electrical equipments in acc. with danger zones	Zeners barriers etc.	
		Inert Gas Plant (optional)		
		Inert Gas system fully operational		
		Condition of all instrumentation	Special O2 meter	
		Condition of all alarms and trips	High and low level alarms etc.	
		Sewage Plant		
		Sewage Plant fully operational	Alarms, level switches etc.	
	10113.2	Position of valves correct	Check if the by-pass valves are closed	

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	10100	Machinery		
		Fire Pumps		
		Position of firepump valves	Are instructions available for position of valves	
	10114.2	General check of emergency firepump	Position of Fuel valve, Content of fuel tank etc.	
	10114.3	Operating instructions of firepump and drive-unit	Clear instruction board available	
	10115	Emergency Electrical Stops		
		Emergency stops of general service pumps	Last time tested	
	10115.2	Emergency stops of steering gear pumps	Last time tested	
		Emergency stops of fans	Last time tested	
		Quick Closing Valves		
		Condition of closing valve station	Check for clear instructions	
		Condition of closing valves E.R.	Check for obstructions or other objects	
		Gauge Glasses		
		Condition of gauge glasses closing valves	Check proper working and if they are normal closed	
		Condition gauge glasses lub. oil tanks	Check proper working and if they are normal closed	
		Condition gauge glasses chemical tanks	Check proper working and if they are normal closed	
		Condition gauge glasses fuel tanks	Check proper working and if they are normal closed	
		Ventilation		
		Fire flaps in trunks engine room	Check markers open/close and proper working	
	10118.2		Check proper working	
		Exhaust gases of machinery		
	10119.1	Emission of main engines	Content NOX en SOX	
	10200	Steering Gear		
	10201	SOLAS requirements		
		Steering gear unit complies with SOLAS		
	10201.2	Steering gear room complies with SOLAS		_
	10201.3	Steering gear unit - and room cleanliness	Check for hydraulic leaks, presence of water and / or oil in drip-trays	
		Change over procedures		
		Emergency steering gear change over procedures	Signs posted with instructions for emergency change-over	
		Procedures for emergency change-over visible	Clearly visible near controls of steering gear unit	
		Testing		
		Emergency-steering tested recently	Check records in engine / deck logbook	
	10203.2	Steering Gear	Check records in engine / deck logbook. Testing before arrival and departure.	

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	10200	Steering Gear		
	10204	Charging emergency header tank		
		Emergency header tank fully charged		
		Fixed storage tank installed		
		Compass		
		Compass present in steering gear room		
		Compass clearly visible from control-station		
		Bridge Communications		
		Satisfactory communications with bridge		
		Telephone availabel and working		
		Sound powered telephone available and working		
		Visibility of Rudder Angle Indicator		
		Rudder angle indicator present		
		Rudder angle indicator visible at steering position		
		Access to Steering Gear		
		Entrance door to steering gear room closed Access to steering gear unit unobstructed	Door to be kept closed at all times and not lashed or blocked in open position Steering gear room should be uncluttered with easy access to all components of the system	
-		Safety and protection measures fitted	Vessels > 10.000 GT should have railings around the steering gear and deck non-slip surface	
		Bilge alarms	Alarms high level & high-high level in good condition	
			Alamis night level & high-night level in good condition	
		(Cargo) / Ballast System		
		Drawings / Diagrams Layout in Control Room		
		All relevant drawings and diagrams available	Pipe Line diagrams, mimic diagrams etc should be available	
		Drawings visible	Drawings clearly visible and understandable for operation	
		Loading manual / history reports	Check for typical loading / unloading sequences	
		Functioning of (Cargo) / Ballast Pumps		
		Is every separate pump working		
\parallel		Ballast pumps with temperature sensors Is all equipment combined working		
		Meters / Displays inside control room		
-			Charle of warting, approved and commonly used	
-		Hull bending / Shear force indicator (*) Loading instrument	Check of working, approved and commonly used Check of working, approved and commonly used	
	10303.2	Loading instrument	Check of working, approved and commonly used	

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	10400	Structural		
	10401	Drawings		
	10401.1	Review of all relevant structural drawings	Overview structural design and scantlings	
	10402	Reports		
	10402.1	Classification reports	Survey reports with thickness readings, recommendations and conditions of class, repairs	
	10402.2	State Authority reports	Survey reports, recommendations	
	10402.3	Company Reports	Inspection reports, repair, maintenance and dry-dock reports by ship's staff and superintendents	
	10402.4	Inspection guidelines	Guidelines on the means of access to structures for inspection and maintenance of oil tankers	
		Other reports	Vetting reports by chartering companies and independent surveyors	
	10403	External Hull		
		Condition shell plating	Check for indents,cracks, paint-condition / corrosion, pitting and / or cargo stripes	
		Condition from deck to light-loadline	Check reverse side lower-end topside ballast tanks and intersection vertical frames	
		Condition boottop and deep-loadline	Check reverse side upper-end double bottom ballast tanks and intersection vertical frames	
		Condition deep-loadline and flat bottom	Check bilge keels for wrongl designs and bad welds	
		Condition flat-bottom	Check reverse sides of longitudinal girders / transverse webs & transverse stools under bulkheads	
		Cargo Hold		
		General condition main-strength structure		
		Condition shell frame	Check for cracks, leakages connecting brackets at upper - and lower side tanks	
		Condition corrugated bulkheads	Check connection with upper- and lower stools	
		Condition hatch-coamings	Checks connections hatch end beams and longitudinal hatch coamings	
		Condition corrosion protection systems	Check condition coating and / or sacrficial anodes	
		Corrosion locations	Locate corrosion on frames/brackets,shell-plating,tanktop,bilges,hopper-surfaces	
		Grab deformations / damage	Check for indents, cracks and / or deformations on all structural hold-parts	
		Shovel/hydraulic hammer deformations / damage	Check for deformations and / or damages near bulkheads,brackets,stringers,webs,girders	
		Condition access platforms,walkways and ladders	General condition of all supports (damages, corrosion and / or cracks)	
		Condition pipelines and valves	Check for leakages / corrosion, temporary repairs and patches (also protection guards)	
		Bilge wells and strainer	Check content bilge and free of cargo	
		Cargo handling deck fittings and storage spaces		
		Condition of the cargo deck		
		Condition of chain lockers		
		Condition of mud tanks		
		Condition of shark jaw, towing pins and stern roller		
	10405.13	Condition of anchor and working winch		

		Green A	ward Visual Inspection - Offshore Supply Ship	
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
	10400	Structural		
	10406	Ballast Tanks		
	10406.1	Condition structural integrity	Check main-strength members and general condition	
	10406.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages	
	10406.3	Condition webs	Check webs near connection with longitudinal at shell and bulkheads	
	10406.4	Condition brackets	Check connection brackets as support for transverse shell frames in cargo-holds	
		Corrosion pattern	Locate corrosion in deckhead-, bulkhead (near bunkers) areas, bottom- and longitudinal-plates	
	10406.6	Condition pipelines and valves	Check for leakages and corrosion , temporary repairs and patches, hydraulic leaks overhead-area	
		Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.	
	10408	Void Spaces / Cofferdams / Pipe duct		
	10408.1	Condition structural integrity	Check main-strength members, any non-continous structural material and general condition	
	10408.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages	
		Corrosion pattern	Locate corrosion in deckhead-, bulkhead (near bunkers) areas, bottom- and longitudinal-plates	
	10408.4	Condition pipelines and valves	Check for leakages and corrosion, temporary repairs and patches, hyraulic leaks overhead-area	
		Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.	
	10409	Bunker Oil Tanks		
	10409.1	Condition structural integrity	Check main-strength members, any non-continous structural material and general condition	
	10409.2	Condition brackets, stringers, webs and girders	Check for deformations, fractures, damages, leakages	
		Corrosion pattern	Locate corrosion in deckhead-, bulkhead areas, bottom- and longitudinal-plates	
		Condition pipelines and valves	Check for leakages and corrosion , temporary repairs and patches, hydraulic leaks overhead-area	
	10409.5	Condition access platforms, walkways and ladders	General condition of all supports, corrosion, cracks etc.	

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREN AWARD	Inspection Focus	Remarks
	10400	Structural		
	10410	Main Deck & Fittings		
	10410.1	Deck plating - deformations	May indicate problems from underneath, stiffeners or underneath deck-plating	
	10410.2	Deck plating - fractures	May indicate substantial corrosion and / or local stress areas	
	10410.3	Deck plating - damages	Caused by collissions and / or grab damage	
		Coaming corners	Check corner areas and underneath bracket-supports for damage / corrosion	
		Tank entrances and deck openings	Condition check covers and closing devices	
		Pipeline couplings, flanges, branches and supports	Condition check, deformation, cracks, corrosion, tightness	
		Closing appliances for ventilation	Condition check covers and closing devices	
		Bunker and oil tank derating pipes	Check flame screens and coamings	
		Accomodation & Machinery Spaces		
	10411.1	Structural integrity	General condition, damages & defects	
		Doors, windows, ventilation ducts, closing devices	Condition check and water tightness	
		Stairs and platforms	Condition check, corrosion / deformations	
		Pipelines, valves, couplings, overboard connection	Condition check	
		Safety equipment	Condition check CO2, Halon system, extinguishers, fire hoses, alarms etc.	
		Certificates for safety equipment		
		Mooring equipment		
		Mooring lines	Condition mooring lines	
		Winches	Foundation bolts firm, casing crack-, corrosion-free, no leakages and save-all	
		Condition winch-brakes	Check last test report and thickness linings	
		Anchoring equipment		
		Anchors, anchor shackles and chain	Wear, corrosion, clearances inside hawser pipe	
		Anchor winch and associated gear	Foundation, no leakages, condition of brakes, hinges and hinge plates	
	10413.3	Anchor securing	Condition and workable	

	Green Award Visual Inspection - Offshore Supply Ship			
Check Box	Norm item	GREEN AWARD	Inspection Focus	Remarks
